OBJECTIVE

Driven full-stack MERN (MongoDB, Express, React, Node.js) developer with practical experience gained from a recent internship. I played an integral role in two collaborative, real-time projects and successfully completed an independent project. I am excited to apply my skills in creating responsive, scalable web applications within a dynamic, technology-focused organization, utilizing both my front-end and back-end expertise to foster innovative digital solutions.

EDUCATION

Master of Arts in History
Manonmaniam Sundaranar University, tirunelveli
2022 - 2024

Bachelor of Arts in History
St. John's College, Palayamkottai

Certifications

- The Complete 2024 Web Development Bootcamp in Udemy (Online)
- Google UX Design Professional Certificate in Coursera (Online)

EXPERIENCE

Fullstack Mern Stack Intern in BrassyTechnologies | Jun2024 - Present

- Developed and deployed web applications using the MERN stack, contributing to two team-based projects and one independent project.
- Created responsive user interfaces and integrated backend services with RESTful APIs.
- Enhanced skills in debugging, version control with Git, Gitlab and project management.

PROJECTS

- **StreamJet -** Fullstack Website

  The StreamJet company website was meticulously designed and developed, emphasizing both frontend and backend aspects. Key contributions include:
  - A responsive user interface crafted with React and Ant Design to enhance user experience.
  - Robust backend solutions utilizing Node.js, Express, and MongoDB, featuring user authentication and project management capabilities.
  - Optimizations for performance, integration of dynamic components, and functionality across multiple platforms.

- **Ride On -** Frontend Website - www.ride-on.com

  Developed a responsive website for Ride On, a car rental service offering vehicles with professional drivers. Built using React and Ant Design (AntD), the platform features:
  - Dynamic car listings with pricing based on seating and luggage capacity.
  - Responsive design, optimized for both desktop and mobile.
  - A modern, user-friendly interface using custom styling and AntD components.

- **THT World -** Frontend Website - www.thtworld.me

  Created a static website for THT World, a women's hair salon located in Dubai, utilizing React along with custom styling. My contributions included:
  - Designing an engaging landing page that boosts user interaction through various components.
  - Ensuring the website is optimized for multiple devices with responsive CSS techniques.
  - Providing top-notch frontend development and design skills.

- **Kodai Agri Website -** Frontend Website - www.kodaiagriorg.com

  Served as a Frontend Developer in creating a static website for Kodai Agri, a platform dedicated to supporting avocado farming in the Kodaikanal Hills. Key Contributions:
  - Developed and designed frontend components utilizing React.
  - Established the Services and Gallery sections, enhancing the site's overall functionality.
  - Partnered with the client to secure a 5-year service agreement, ensuring continuous support.
